Welcome to the SunLife Equity Release Report 2020

The COVID-19 pandemic has made 2020 a year unlike any other.

With 9.4 million jobs furloughed by the end of June¹, average real pay is down² and with millions worried about their financial security, people are looking for ways to bolster their income or pension.

For some, equity release could be the answer. So perhaps it's no surprise that 6% of over 50s

said they would consider it now, when they wouldn't have before the pandemic.

But there's still a way to go when it comes to awareness, with 90% of people saying they don't fully understand equity release.

Read on to find out more about what's important to the over 50s in 2020 – and how equity release could help them.

Conclusion

Conclusion

It seems the COVID-19 pandemic hasn't changed people's opinions on equity release too much. Although 6% of people would now consider getting a plan, when they wouldn't have before.

But with 90% of the over 50s still unsure about how it all works, there's more we could be doing to let people know the ins-and-outs of equity release.

Especially as a quarter of over 50s also think equity release will leave their children in debt, and over a third think you risk losing your home.

Misconceptions such as these could be preventing thousands of people from getting money when they need it most.

Of course, equity release isn't for everyone. But it's important that, where possible, people are given the chance to have the retirement they deserve. And equity release could be the solution for many.
